1. SRS

1.1. Legend

1.1.1. User Management System (UMS)

Requirement- Code	Requirement Description	Use Case
UMS-F-1	System should allow the user to register.	Register User
UMS-UR-1.1	System should allow registered user to login using login portal.	
UMS-NF-1.1	Password should contain alphanumeric symbols.	
UMS-NF-1.2	Users can make their password visible.	
UMS-NF-1.3	The user should first authorize their email or phone number before getting registered into the system.	
UMS-F-2	The system should allow the user to Login into their accounts.	User Login

UMS-NF-2.1	The system should authenticate users before getting logged in to their accounts.	
UMS-NF-2.1	The system should allow the users to save their login status and get automatically logged in, in a device even if they close the application.	
UMS-UR-2.1	The system should allow the users to change their passwords if they forget their password	Forget Password

1.1.2. Recommendation Management System (RMS)

Requirement – Code	Requirement Description	Use Case
RS-F-1	The system should suggest users to different users based on their ratings, interests, etc.	Recommend User
RS-NF-1.1	The system should recommend users based on the rating the user has. i.e., if user 1 has a rating of 5 and user 2 has a rating of 6 then, user 1 and user 2 are a match else user 2 does not match user 2	
RS-NF-1.2	The users get matched only if both the users like each other.	

1.1.3. Notification Management System (NMS)

Requirement – Code	Requirement Description	Use Case
NMS-F-1	The system should notify users if a match is found.	User Notification
NMS-UR-1.1	The users can enable notification alert as well as disable it.	
NMS-NF-1.1	The system should notify users if a user sends him/ her a message.	

1.1.4. **Messaging System (MS)**

Requirement – Code	Requirement Description	Use Case
MS-F-1	The system should allow the users to send messages to other users	User Message
MS-NF-1.1	The word limit of the message should not exceed than 500.	
MS-NF-1.2	The users can only send a message to other users only if the users are a match to each other.
